

Proponent Kaye P. Engbino

Proposed Problem Statement I have been using a To Do desktop application in order for me to get notified of the deadlines for my tasks: activities, quizzes, etc. But the application simply just notifies me during deadline. I cannot organize its hierarchy depending on deadlines (time and day). Therefore, I made a certain activity for next week though I have an activity due during the day. I barely passed before deadline.

Proposed Project Task Manager

Proposed Target Users Teachers and Students

Proposed Features

Users of the Desktop Application

- 1.) The user can register a new account with unique username.
- 2.) The user can update his/her information.
- 3.) The user can add tasks.
- 4.) The user can display his/her tasks to do.
- 5.) The user can delete tasks.
- 6.) The user can update tasks deadline, name, and etc.

Administrator of the Desktop Application

- 1.) The admin can log in to his/her account.
- 2.) The admin can update his/her information.
- 3.) The admin add a badge to the users profile to certain milestones of tasks done.
- 4.) The admin add tasks to users.
- 5.) The admin can delete tasks from user.
