

Engbino, Kaye P.

Use Case Diagrams :: GitHub

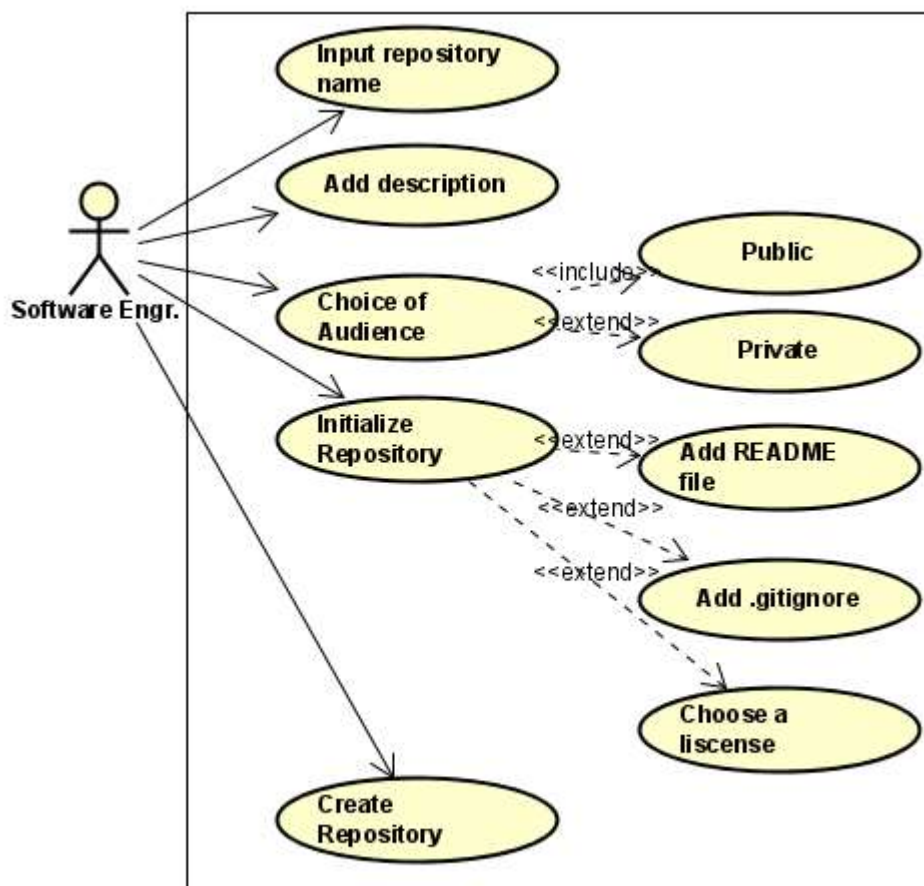

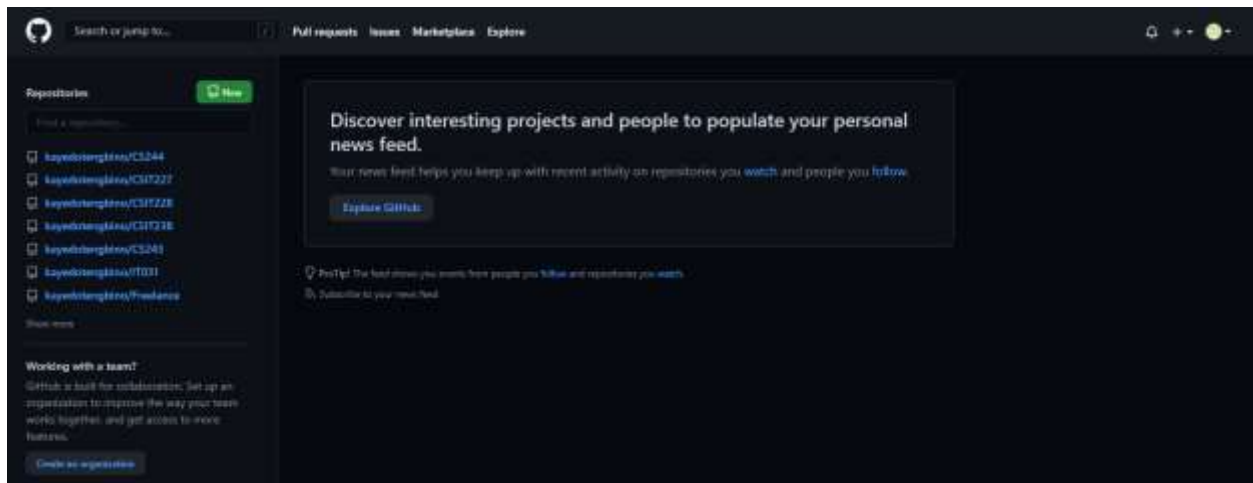

Figure 1: GitHub Creating New Repository

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository.](#)

Owner *

 kayedotengbino ▾

Repository name *

/ asdf 

Great repository names are short and memorable. Need inspiration? How about [didactic-funicular?](#)

Description (optional)

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Skip this step if you're importing an existing repository.

☒ Add a README file

This is where you can write a long description for your project. [Learn more.](#)

☒ Add .gitignore

Choose which files not to track from a list of templates. [Learn more.](#)

☒ Choose a license

A license tells others what they can and can't do with your code. [Learn more.](#)
